

## TRAINING EVENT RESULTS - 26 SEP 12

I would like to take this opportunity to thank those who turned up and benefited from the training.

I would like to stress to unit reps that in order to excel at our sport you must train. Part of that training in running in complex areas with a map, yesterday was an ideal opportunity to do this. I must admit that I was disappointed with the turnout but this will not deter me from promoting our sport and putting on more training events.

For those that did train, the technical terrain hopefully tested and stretched you into improving your process.
